Supplies
Plaster of Paris
Water
Container for mixing
Paper plate
Large bubble wrap
Watercolor paints
2 Paintbrushes (one for the plaster, one for the paint)

Instructions
Cut the bubble wrap into the size you want your moon crater to be and set aside.

Use the container to mix the plaster of Paris with water using a spoon. You want it to be thick enough to stick to the bubble wrap, too runny it will just slide off.

Place your bubble wrap on top of the paper plate. After mixing the plaster, apply it to the top of the bubble wrap with the paintbrush.

When your bubble wrap is completely covered with the plaster of Paris, put it up somewhere safe to let it dry overnight.

When it is dry you will gently peel the bubble wrap off the plaster of Paris.

Next is the fun part, paint it with any color, (I like the glitter watercolor).

Now you have your own moon crater!
